KENDALL CONNECTED TRAINING

PANELVIEW TRAINING

SPRING 2021
(Location details on page 2)

February 9
Basic PanelView Plus 7
Ft. Wayne, IN

March 16
Basic PanelView Plus 7
Grand Rapids, MI

April 6
Basic PanelView Plus 7
Kalamazoo, MI

May 11
Basic PanelView Plus 7
Saginaw, MI

CLASS TIME
9:00am-4:30pm

LUNCH PROVIDED

Instructor-Led, Hands-On Training
· Flexible Training Offering – only choose the days you want
· Scalable Training Offering – classes cover various skill levels
· Individual Training – students will be provided with individual lab stations
· Limited Seating – maximum 8 stations/students per each day of training

About the Training:
The training classes cover the topics listed in the training matrix shown on page 2. For the best learning experience, we recommend taking training classes in a sequence as they build on one another. Having prior knowledge or skills may allow you to take advanced classes without taking the lower-level classes.

The following training classes are available:
· PanelView Plus 7 Basic
· PanelView Plus 7 Intermediate
· PanelView 5000 Basic
· PanelView 5000 Intermediate

About the Instructor:
Roy Radziszewski is an automation and networks instructor. He teaches courses covering various types of Allen Bradley™ AC variable frequency drives, small and medium range PLCs, PanelView graphic terminals, and Networks (including Stratix switches).

During Roy's career he has started-up, serviced and designed control systems, and has deployed thousands of drives for all types of industrial manufacturing applications.

Roy holds an electrical engineering degree from The Milwaukee School of Engineering and an MBA from the University of Houston. In addition, he holds programming certificates (C, C#, Android, and real-time embedded systems) from the University of Washington and University of California, Irvine. Roy is currently working on his CCNA Certification through Cisco.

REGISTRATION INFORMATION:
Cost: $1,095 per student / per day
Register at: keinc.info/KCT-S21
