

WATER / WASTEWATER

Solutions to Optimize Your Plant Operations

A MEMBER OF THE KENDALL GROUP

LOWER PROJECT & MAINTENANCE COSTS

With the rise in water quality standards, Water and Wastewater professionals face significant challenges to maintain an aging infrastructure. Kendall Electric has the products and services to help improve existing control and distributions system. We also provide asset management strategies that reduce downtime and increase operational efficiencies.

EXPERT SOLUTIONS

Kendall Electric has experts available to help you control energy use and manage your assets for improved optimization and security. Our network security, process control and motor control specialists can provide solutions to your unique issues and improve your system operations through increased visibility into the production process.

SERVICES

Installed Base Evaluation (IBE)

When critical control systems are no longer supported, it puts your plant at risk. An IBE is a site delivered service that provides actionable intelligence to help you make data-driven decisions regarding the support and obsolescence management of your installed base assets. Services include:

- Identification of product lifecycle status via plant hierarchy
- Identification of migration/conversion priorities
- Identification of excess/shortage of spare parts
- Baseline for determining a strategic maintenance program

Migration Solutions

Kendall Electric is your comprehensive partner for planning, upgrading and implementing industrial control systems. We offer options and resources to help make all the important decisions that fit within your budget including full turnkey options. Our specialists can migrate your AC or DC drives (competitors brands too), convert PLC controllers, or convert analog to its digital counterpart. We bundle the hardware and labor to give you a competitive price while handling everything from beginning to end.

Safety Training

Kendall Electric can help you avoid safety problems in the workplace and ultimately reduce risk with a safety evaluation. From wet areas, personal protection, ad tripping hazards, to temporary power, motor disconnects, and safe repair and maintenance, the safety evaluation covers a wide variety of safety issues found in industrial environments.

Network Solutions

From network design, to switch configuration, to server virtualization, Kendall Electric can help manage your existing Ethernet/IP infrastructure and/or move legacy plant floor networks to Ethernet/IP. Our experts combine industry leading products with the latest technology and best practices to make your transition seamless and worry-free.

Security Posture Assessments

How vulnerable are you to cyber attacks? Ransomware and other security breaches are prevalent, and most facilities are not ready to face these types of threats. Our assessment will discover vulnerabilities and assess your security risks to provide you with a security hygiene score so you know where you stand and how to improve.

PRODUCT OFFERINGS

BELTS / CLUTCHES / COUPLINGS / GEARS

Altra
Martin Sprocket & Gear Inc.

CHAIN / FLIGHTS / SPROCKETS
